## SURE AND SECURE DATA STORAGE FOR YOUR VALUABLE DATA ASSETS

Your business data is one of your most valuable company assets. We securely protect your information from the moment we pick up the backup tapes to the time the tapes are vaulted.

Computer tapes, disks and other precious media require specialized temperature and humidity control as well as protection from disaster in the event of a fire. Our new Bristol, Connecticut facility features in-rack fire suppression, 24/7 video monitoring, card swipe security access and the state's ONLY approved fire protected media vault. In addition, a 4-hour rated steel bank vault door with a high security combination lock ensures access by only authorized personnel. The vault has a separate temperature and humidity control system which is constantly monitored. Dupont Archives is also monitored 24/7/365 by a UL approved independent security company insuring around the clock security of your company data.

CALL TODAY 800.684.6653 for a free consultation and to find out why the time to switch is now. At Dupont Archives the box stops here.
